-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 40-48, drawn to a trench-gated MIS device, classified in class 257, subclass 329.
 - II. Claims 20-39, drawn to process of fabricating an MIS device, classified in class 438, subclass +1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the trench-gated MIS device can be manufactured by a different process including the step of overflowing a gate material outside of a trench area and leaving an inactive gate material portion over the trench area in order to create a contact area for a subsequent gate metal layer, instead of etching the gate material to a level below the surface of a semiconductor chip in all areas of the chip, as claimed.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Additionally, this application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-19 and 40-48 are directed to the following patentably distinct species of the claimed invention:

- A. Species I - the embodiment as illustrated in Figure 9.
- B. Species II - the embodiment as illustrated in Figure 10.
- C. Species III - the embodiment as illustrated in Figure 11.
- D. Species IV - the embodiment as illustrated in Figure 15A.
- E. Species V - the embodiment as illustrated in Figure 16A.
- F. Species VI - the embodiment as illustrated in Figure 17A.
- G. Species VII - the embodiment as illustrated in Figure 18.
- H. Species VIII - the embodiment as illustrated in Figure 19.

Claims 20-39 are directed to the following patentably distinct species of the claimed invention:

- A. Species I - the embodiment as illustrated in Figures 20A-20F.
- B. Species II - the embodiment as illustrated in Figures 21A-21I.
- C. Species III - the embodiment as illustrated in Figures 22A-22I.
- D. Species IV - the embodiment as illustrated in Figures 23A-23J.
- E. Species V - the embodiment as illustrated in Figures 24A-24I.
- F. Species VI - the embodiment as illustrated in Figures 25A-25F.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edgardo Ortiz whose telephone number is 571-272-1735. The examiner can normally be reached on Monday-Friday (1st Friday Off).

Art Unit: 2815

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on 571-272-1664. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
